DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on 30 September 2002. It is noted, however, that applicant has not filed a certified copy of the Japanese application 2002-284628 application as required by 35 U.S.C. 119(b).

Allowable Subject Matter

Claims 1, 3, and 4 are allowed.

Allowable Subject Matter

The prior art fail to disclose or suggest sealing material comprising a P_2O_5 -SnO low melting glass powder whereas the softening point is from 300 °C to 400 °C. Furthermore the sealing material contains fine insulating oxide particles with a particle diameter as specified in the instant claims that is uniformly distributed on the surface of the P_2O_5 -SnO low melting glass powder.

The closest prior art is deemed to be U.S. Patent 6,355,586 by Usui et al. and U.S. Patent 6,048,811 by Morena. Neither Usui et al. nor Morena teach or suggest a P_2O_5 -SnO low melting glass powder having the softening point as recited in the claims wherein there are fine insulating oxide particles uniformly distributed on the surface of the P_2O_5 -SnO low melting glass powder.
